Maryland Classroom Connection: Engineering Your Future

Educating students about the many opportunities in engineering is our specialty, and the Clark School offers various ways to help students learn through presentations, hands-on activities, and tours. The Office of Undergraduate Recruitment in Engineering, the Women in Engineering program, and the Center for Minorities in Science and Engineering facilitate programs and resources for prospective students. We begin by explaining how math and science can be applied in engineering, the experiences available at the University of Maryland, College Park, and describe what careers engineers pursue. With the help of current engineering students, the Clark School Ambassadors, we can show you the exciting experiences available in engineering!

Engineering in the Classroom

To increase awareness of the many opportunities in Engineering, we are available for **individual appointments** with math and science department chairs, instructors, and school staff. The Ambassadors can visit classes, student groups, and math/science related clubs for **engineering presentations and hands-on activities**. These workshops cover different disciplines in engineering and show how they combine to solve real-world challenges. We can also participate in **panels, presentations, or other programs** you may be planning, so please contact us to discuss your events.

Engineering at Maryland

If you are planning a visit to campus, we can help you design your own visit. The following events are examples of the many ways you can experience the programs and possibilities at Maryland!

- ✓ Prospective students can shadow a current engineering student and attend class
- ✓ Overnight stays for admitted students
- ✓ Individual appointments with college and/or department representatives are available
- ✓ Friday Engineering Information Sessions include tours of engineering labs
- ✓ School field trips to campus (options include tours, presentation, hands-on activities)
- ✓ Summer camps and workshops are also available; please contact us for information
