

# R&D in Electrical & Computer Engineering

**Prof. Bruce Jacob**

Keystone Professor

Director of Computer Engineering

National Student Leadership Conference, Summer 2008

# Today's Outline

- Background (mine)
- Engineering careers in general
- Embedded systems issues
  - *why does everything break?*
- Computers & their memory systems
  - *how do I make my computer faster?*
- Design as modern engineering entrepreneurship
  - *my take on The World Is Flat ... and guitars*

# *(Who Is This Old Guy?)*

- **High school** (GA & FL): salutatorian, three-season athlete, into rock, law, sci-fi
- **College** (Harvard): astr/math, A/B student, one-season athlete, into music, food, art
- **Teaching** (Thayer): high-school math
- **Industry** (BT, PCM): software developer, system architect (employee #2)
- **Grad school** (Michigan): computer software and hardware ... research

# Points to Take Home

- Engineering rocks
- Challenging & important problems exist
- Electrical engineering  $\neq$  electrician  
Computer engineering  $\neq$  programmer
- Anything that is in your head today  
can (**should**) be in your hands tomorrow
- People are willing to **pay you to think**  
*(being smart is only a disadvantage now)*

I of IV

*General Overview:*  
Career Paths in  
(E&C) Engineering

# Your Career Options

Paths I Will Discuss (briefly):

- *Industry* B.S. or M.S.\*\*\*
- *Industry/Research* Ph.D.
- *Academics* Ph.D.\*\*\*

\*\*\* Paths I have taken

# Big Picture

In Computer & Electrical Engineering:

- *Industry*                      B.S. or M.S.      **Develop**
- *Industry/Research*      Ph.D.              **Design**
- *Academics*                  Ph.D.              **Research  
Teach**

**Develop == Build**

**Design == Justify Your Choices**

***Ph.Ds are paid to THINK***

***MSs and BSs are paid to DO***

*(mitigated by size of company)*

# Big Picture

	Industry/BS	Industry/PhD	Academia
Salary Range (0yrs–10yrs)	\$60K–120K	\$90K–150K	\$80K–150K
Job Security	Okay	Good	Great
Freedom	Little	Some	Lots
Respect	Lots	Lots	Little
Visibility	None	Little	Lots
Brief Job Description	Develop	Design	Research & Teach
Perks of the Position	Free coffee	Stock options	Talking to a captive audience

# Start-Up Companies

- Enter at any level
- **Flexible job description**  
*(room to move around)*
- **Flexible pay scales**  
*(SMALL possibility of LARGE pay-off)*
- **Collegiate atmosphere**  
*(working day == noon to 3am)*
- **Downside: RISK FACTOR**  
*(not advised for those w/ mortgage, children, etc. — mitigated by size & age of startup)*

# Big(ger) Picture

	Start-Up Company
Salary Range (0yrs–10yrs)	\$50K–\$120K or more
Job Security	None (... to Lots)
Freedom	Lots
Respect	Lots
Visibility	None
Brief Job Description	Design, Build, Test, Maintain, Deal w/ Customer, whatever
Perks of the Position	Cool atmosphere, intriguing problems, stock options?

Perhaps best  
of both  
worlds?

II of IV

*The Most Important  
Problem Today:*  
Embedded Systems

# EMBEDDED SYSTEMS

# EMBEDDED SYSTEMS

# EMBEDDED SYSTEMS

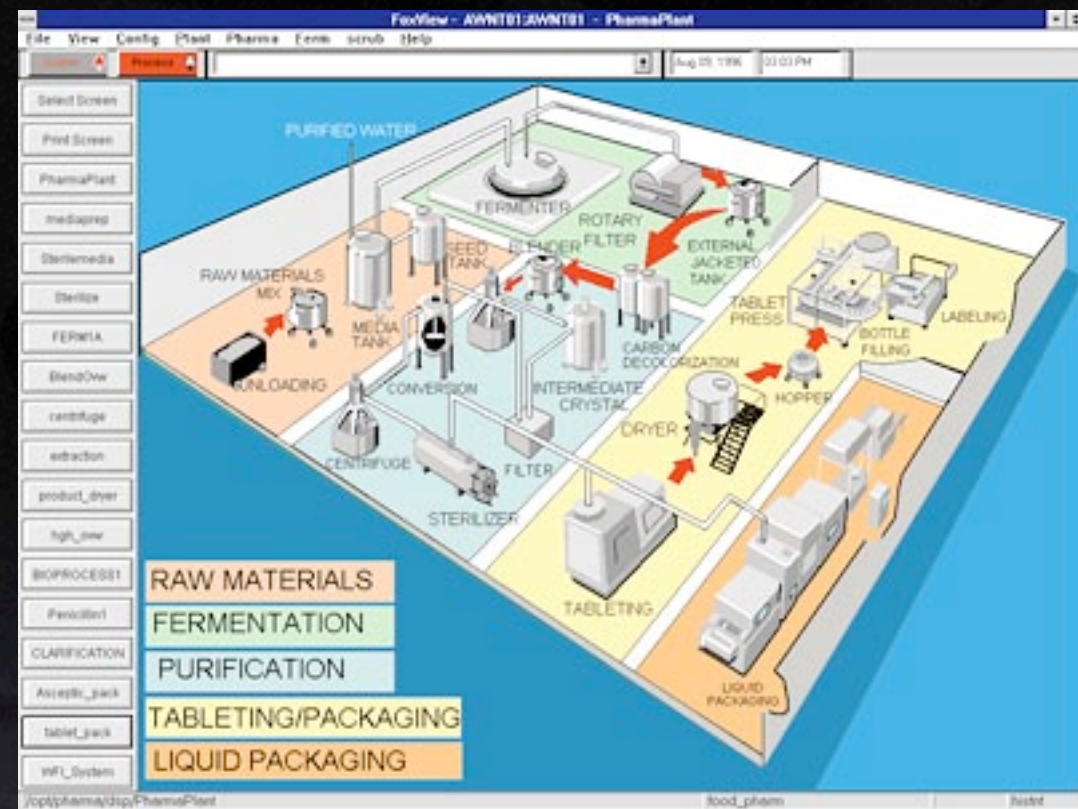

# EMBEDDED SYSTEMS

**Passenger car with ABS 3**  
 1 Wheel-speed sensor  
 2 Wheel-brake cylinder  
 3 Hydraulic pressure modulator unit with master cylinder  
 4 ECU  
 5 Warning lamp

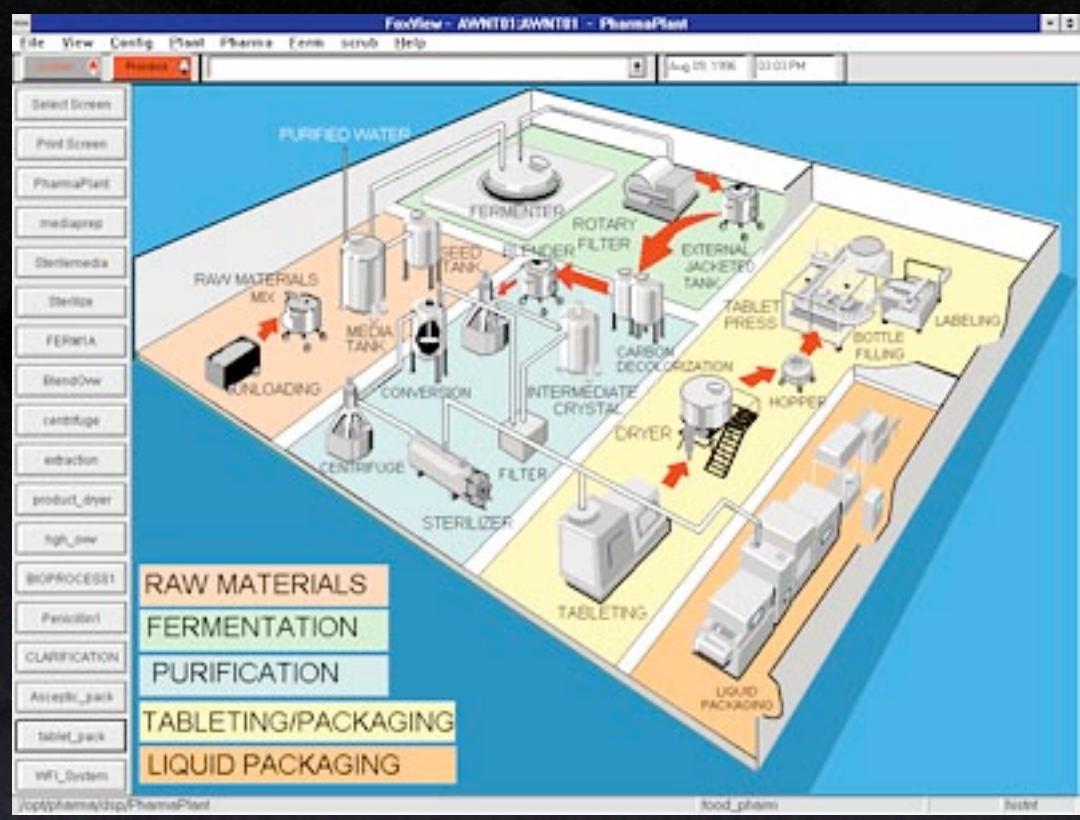

# EMBEDDED SYSTEMS

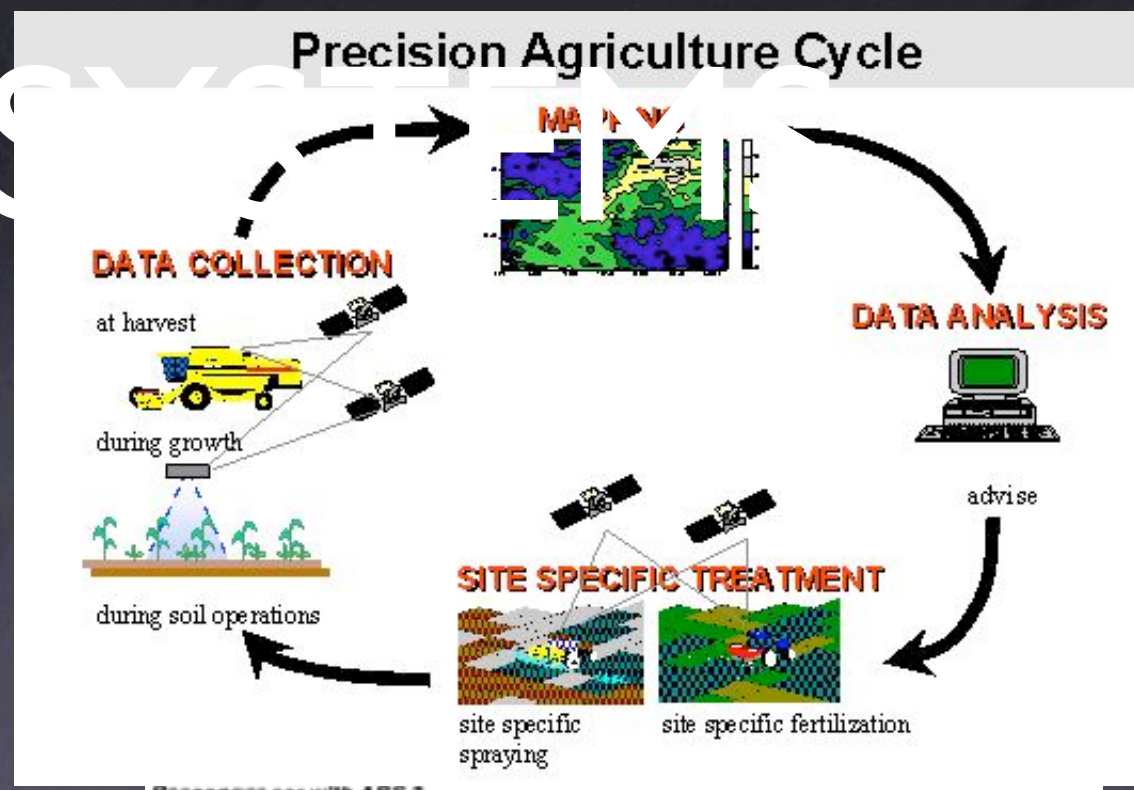

- Passenger car with ABS 3**
- 1 Wheel-speed sensor
  - 2 Wheel-brake cylinder
  - 3 Hydraulic pressure modulator unit with master cylinder
  - 4 ECU
  - 5 Warning lamp

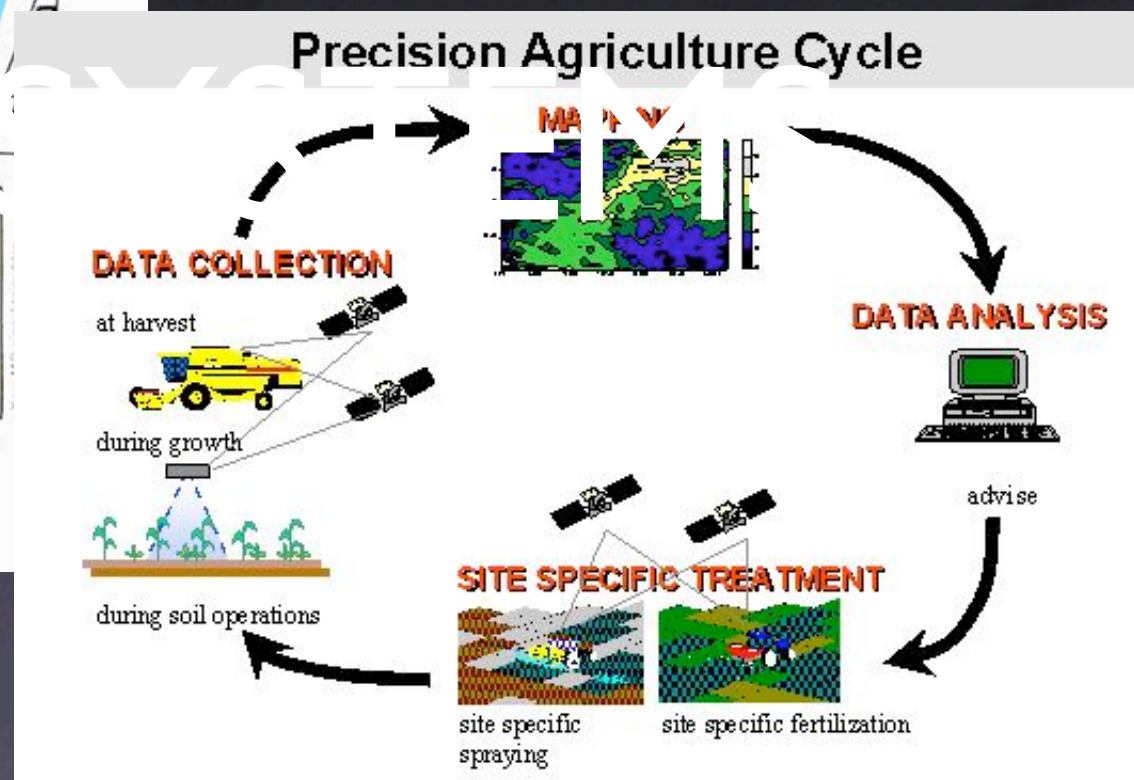

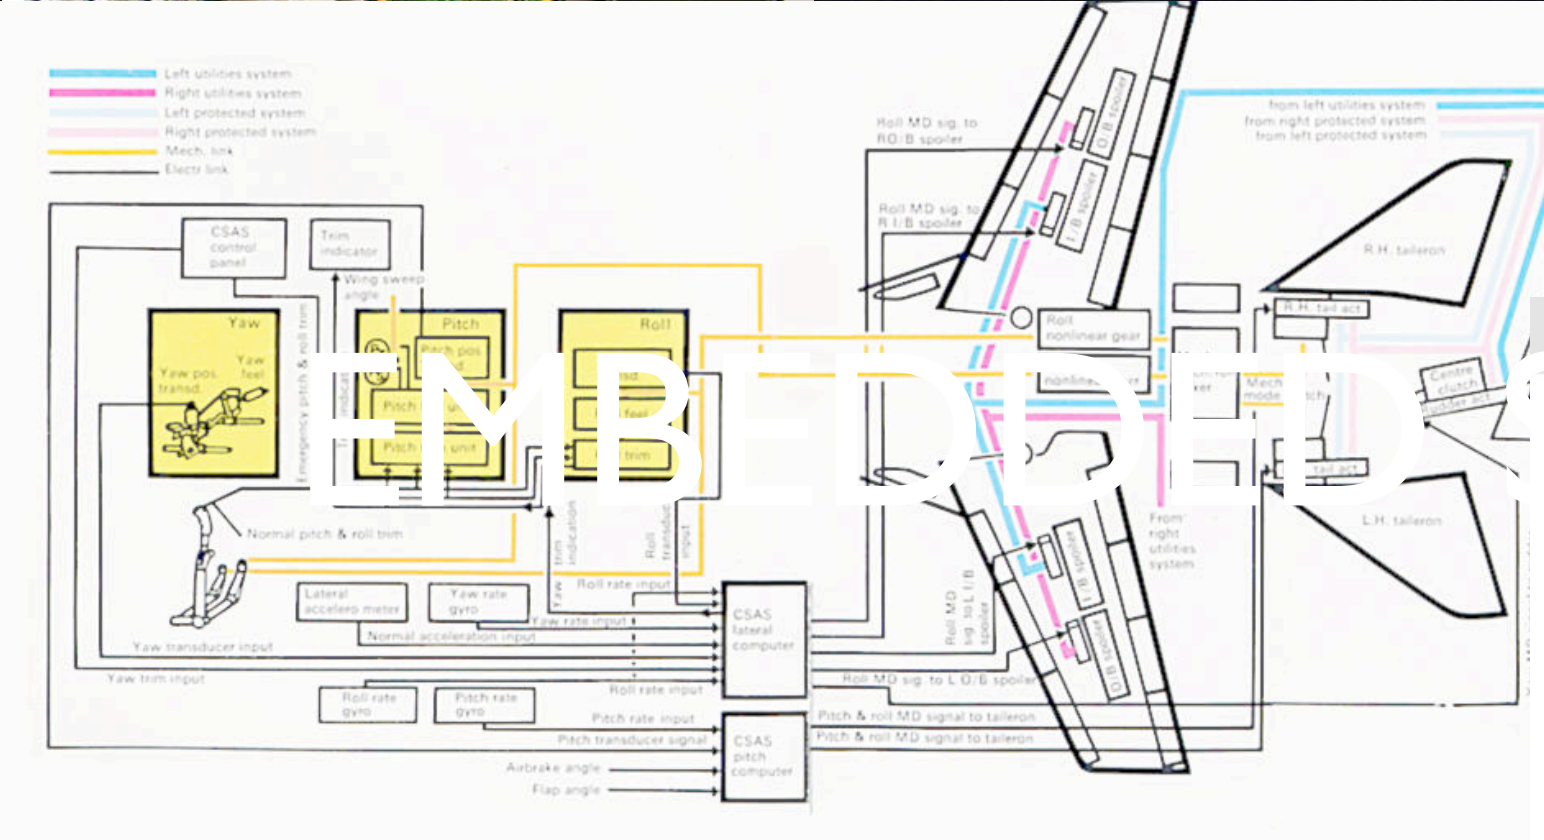

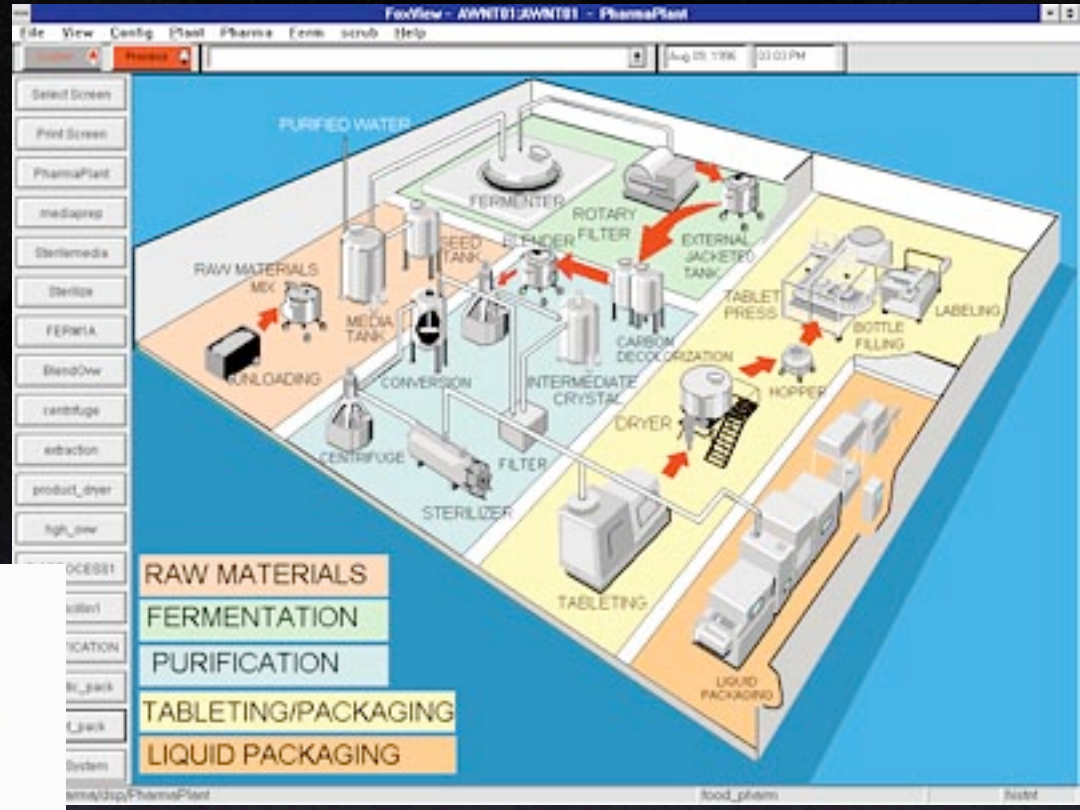

# EMBEDDED SYSTEMS

- Passenger car with ABS 3
- 1 Wheel-speed sensor
  - 2 Wheel-brake cylinder
  - 3 Hydraulic pressure modulator unit with master cylinder
  - 4 ECU
  - 5 Warning lamp

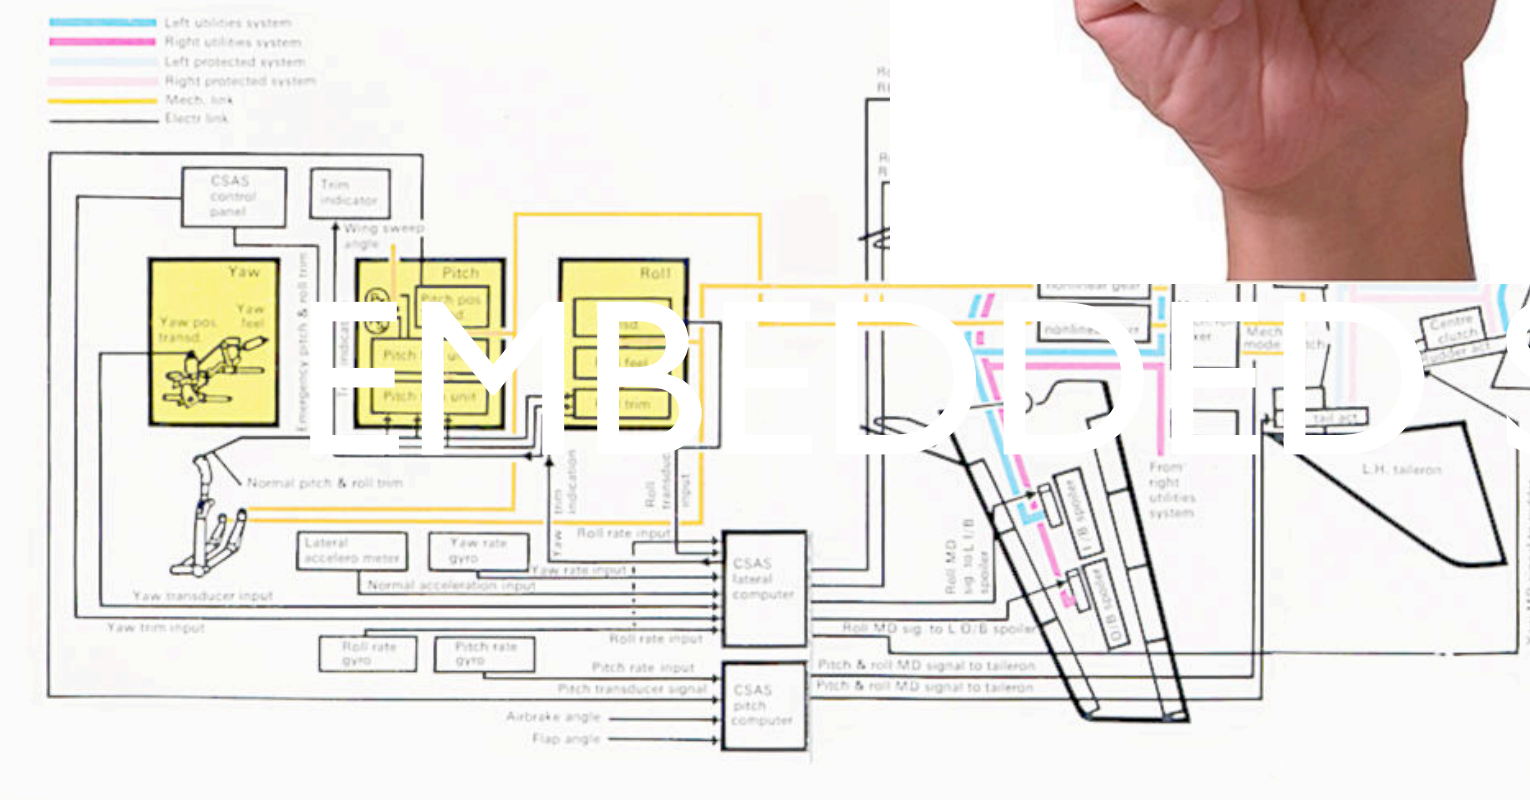

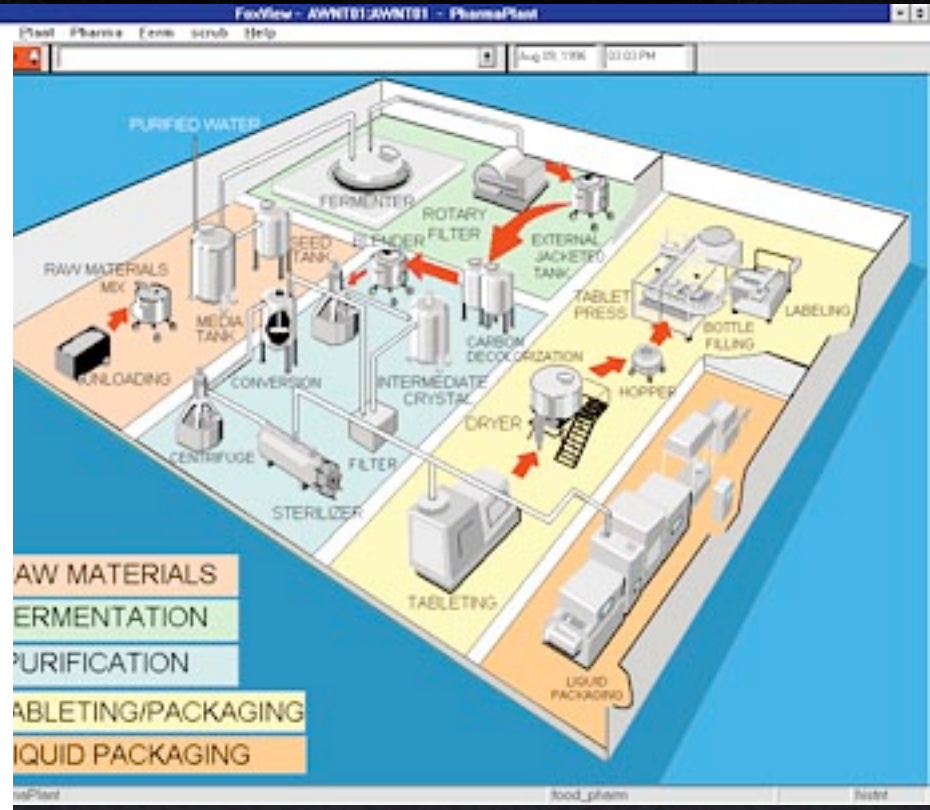

- Passenger car with ABS 3**
- 1 Wheel-speed sensor
  - 2 Wheel-brake cylinder
  - 3 Hydraulic pressure modulator unit with master cylinder
  - 4 ECU
  - 5 Warning lamp

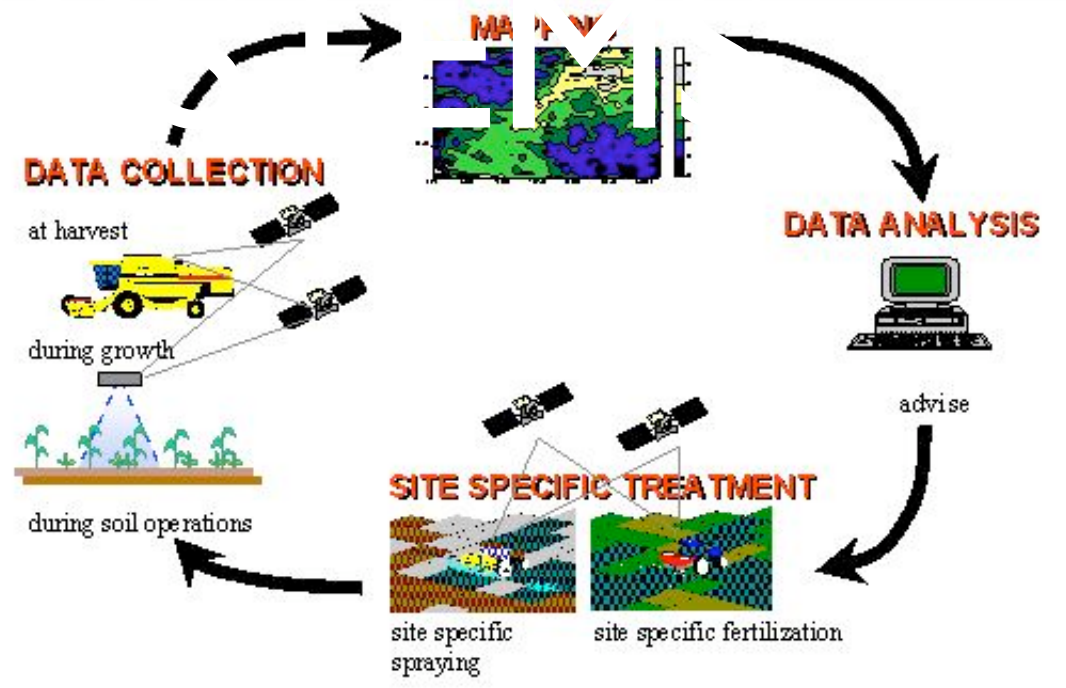

EMBEDDED

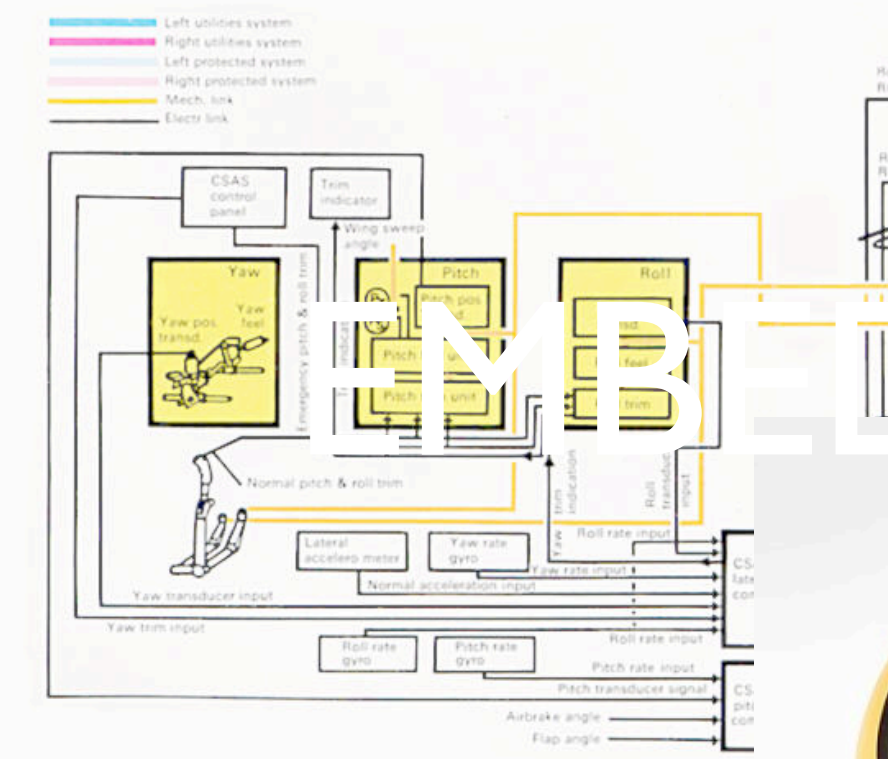

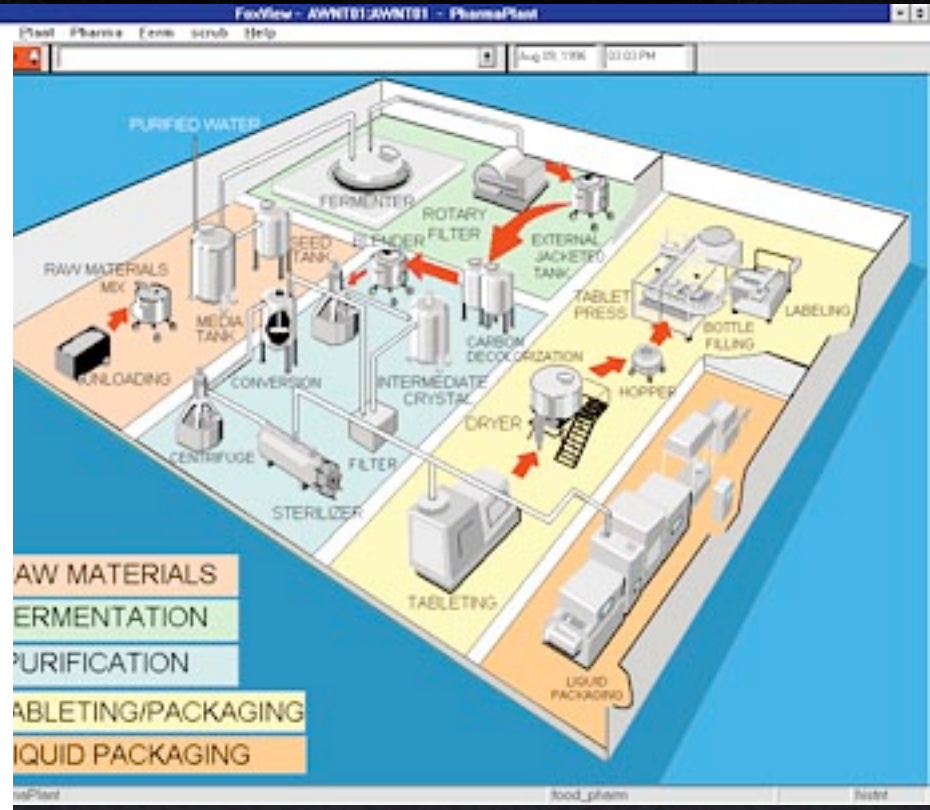

**Precision Agriculture Cycle**

- Passenger car with ABS 3**
- 1 Wheel-speed sensor
  - 2 Wheel-brake cylinder
  - 3 Hydraulic pressure modulator unit with master cylinder
  - 4 ECU
  - 5 Warning lamp

# Characteristics

- Dedicated function (not general-purpose)
- Interact with environment (real-time)
- **Resource-constrained** (power, space, cost)
- **Safety-critical** (loss of life, property, etc.)
- Increasing pressure on **time-to-market**

**THIS IS A BAD MIX**

## Official Trapped in Car After Computer Fails

*Mon May 12, 2003 09:44 AM ET*

BANGKOK (Reuters) - Security guards smashed their way into an official limousine with sledgehammers on Monday to rescue Thailand's finance minister after his car's computer failed.

Suchart Jaovisidha and his driver were trapped inside the BMW for more than 10 minutes before guards broke a window. **All doors and windows had locked automatically when the computer crashed**, and the air-conditioning stopped, officials said.

'We could hardly breathe for over 10 minutes,' Suchart told reporters. 'It took my guard a long time to realize that we really wanted the window smashed so that we could crawl out. It was a harrowing experience.'

## Microsoft Technology Hits the Road in BMW 7 Series

Microsoft Navigates the Automotive Industry, Enhances the Driver Experience

REDMOND, Wash. -- March 4, 2002

COMPONENTS MAY  
BE VERIFIABLE, BUT  
THE SYSTEM IS NOT

# TWO SOLUTIONS

# I. Modeling ...

## What is Required?

- Expertise in **design**: VLSI, PCB, system
- Expertise in **tools**: CAD, codesign, compiler
- Expertise in digital, mixed-mode, MEMS, ...
- Expertise in controls, networks
- Expertise in real-time systems software
- Proven ability to make things that work

# I. Modeling ...

## What is Required?

- *(most importantly)* Foresee all possibilities

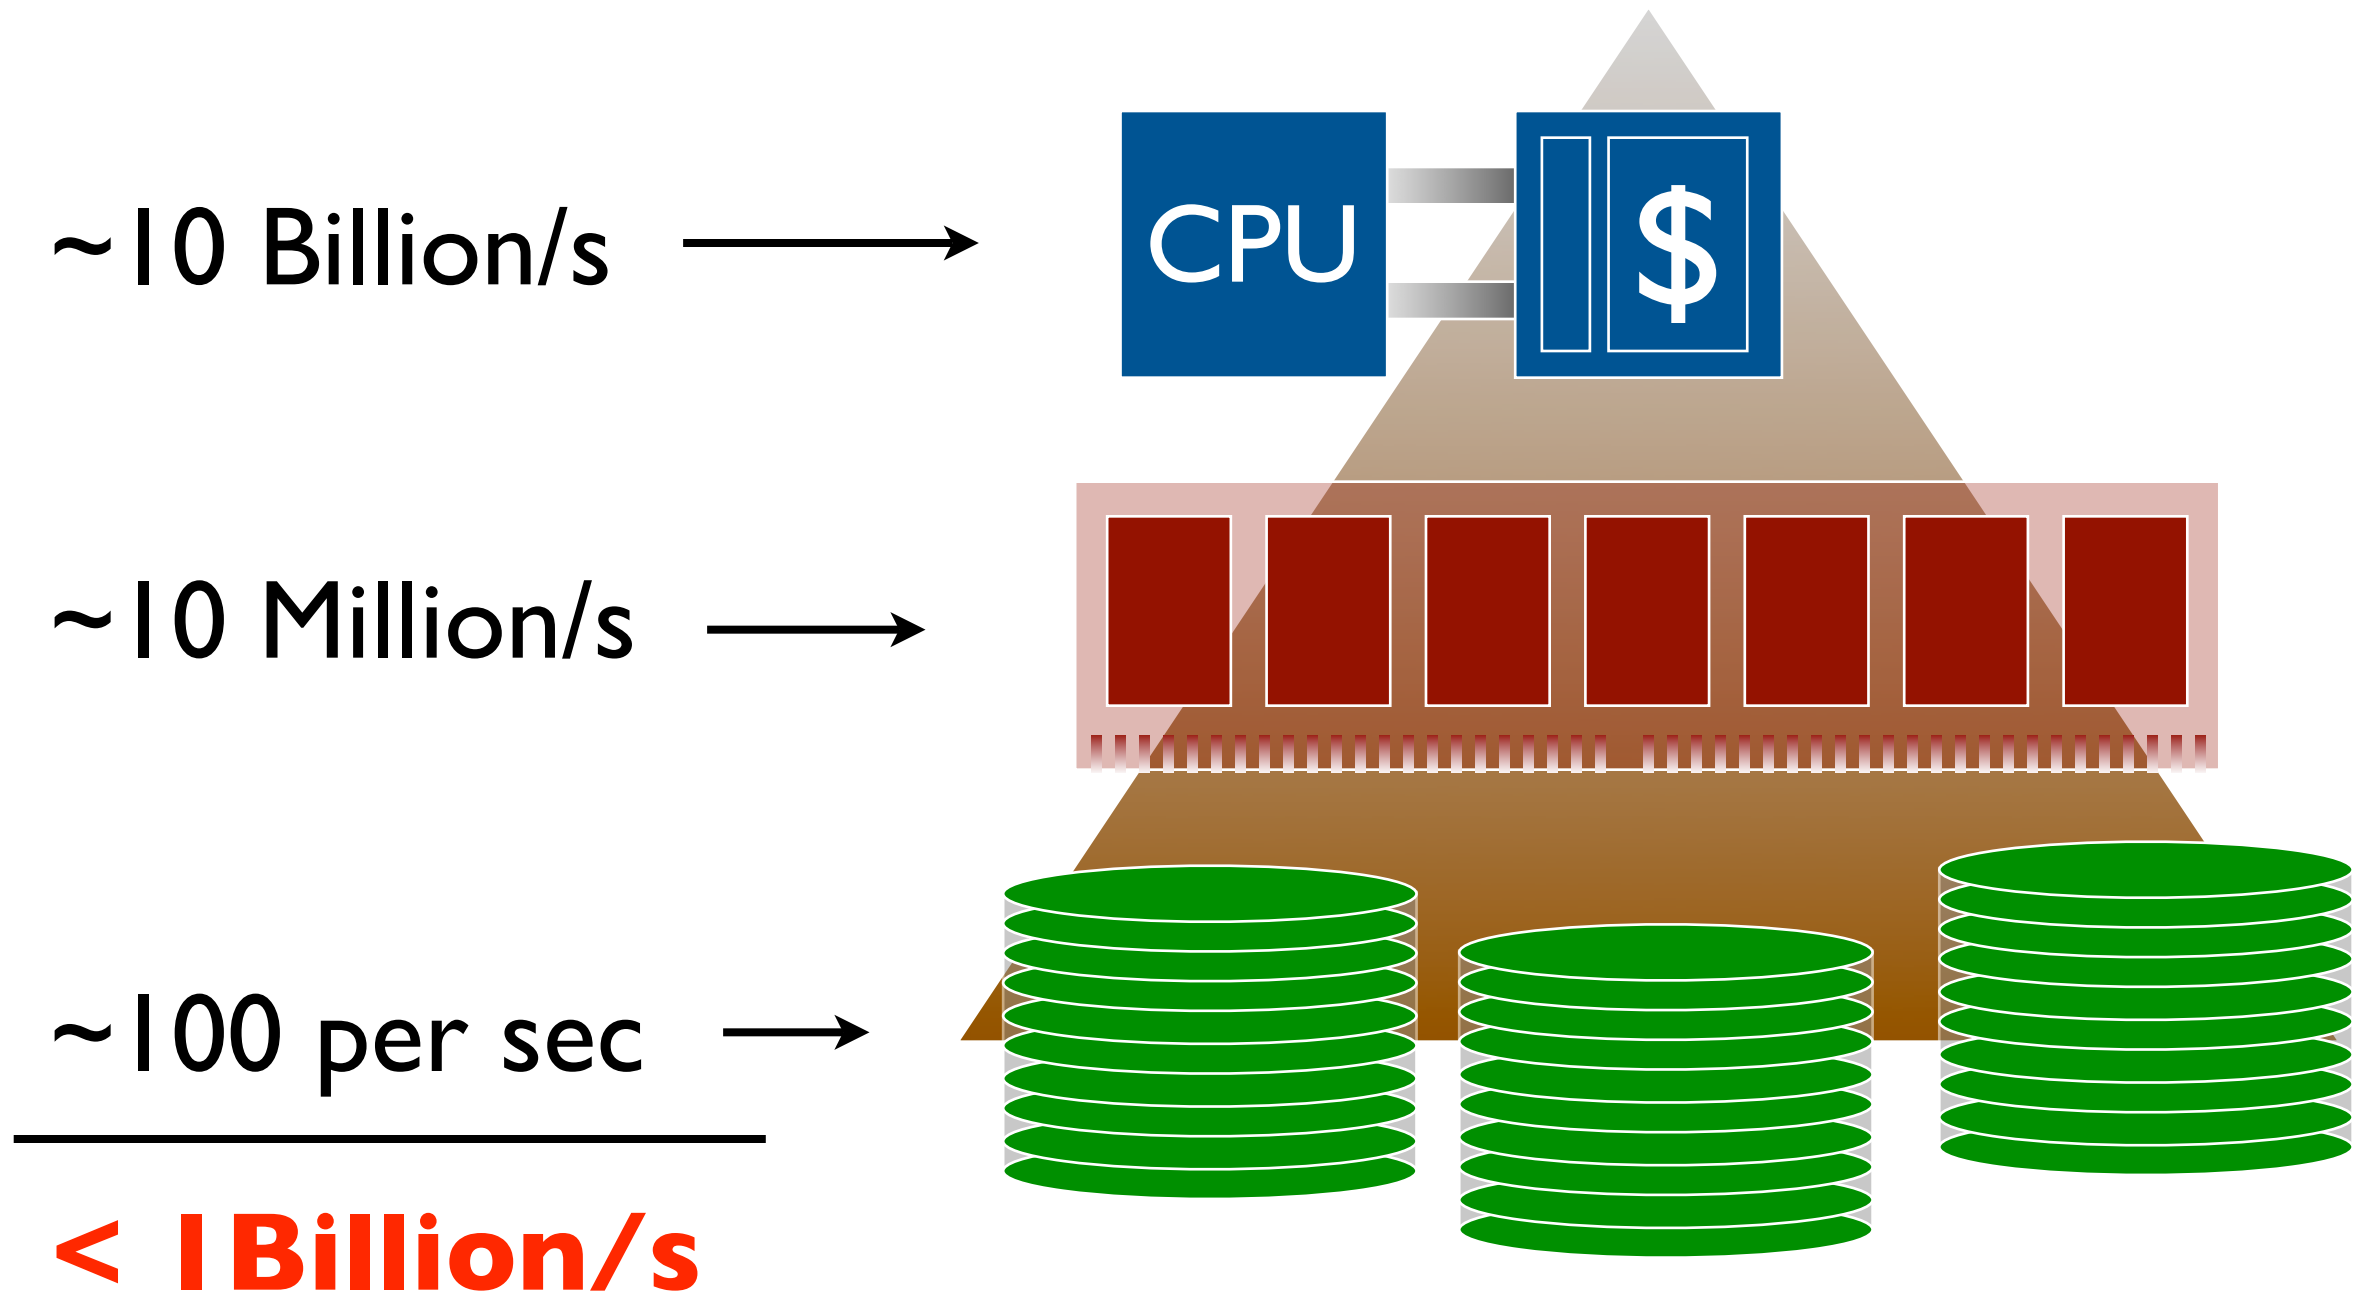

2. Come up with  
a totally new  
understanding

III of IV

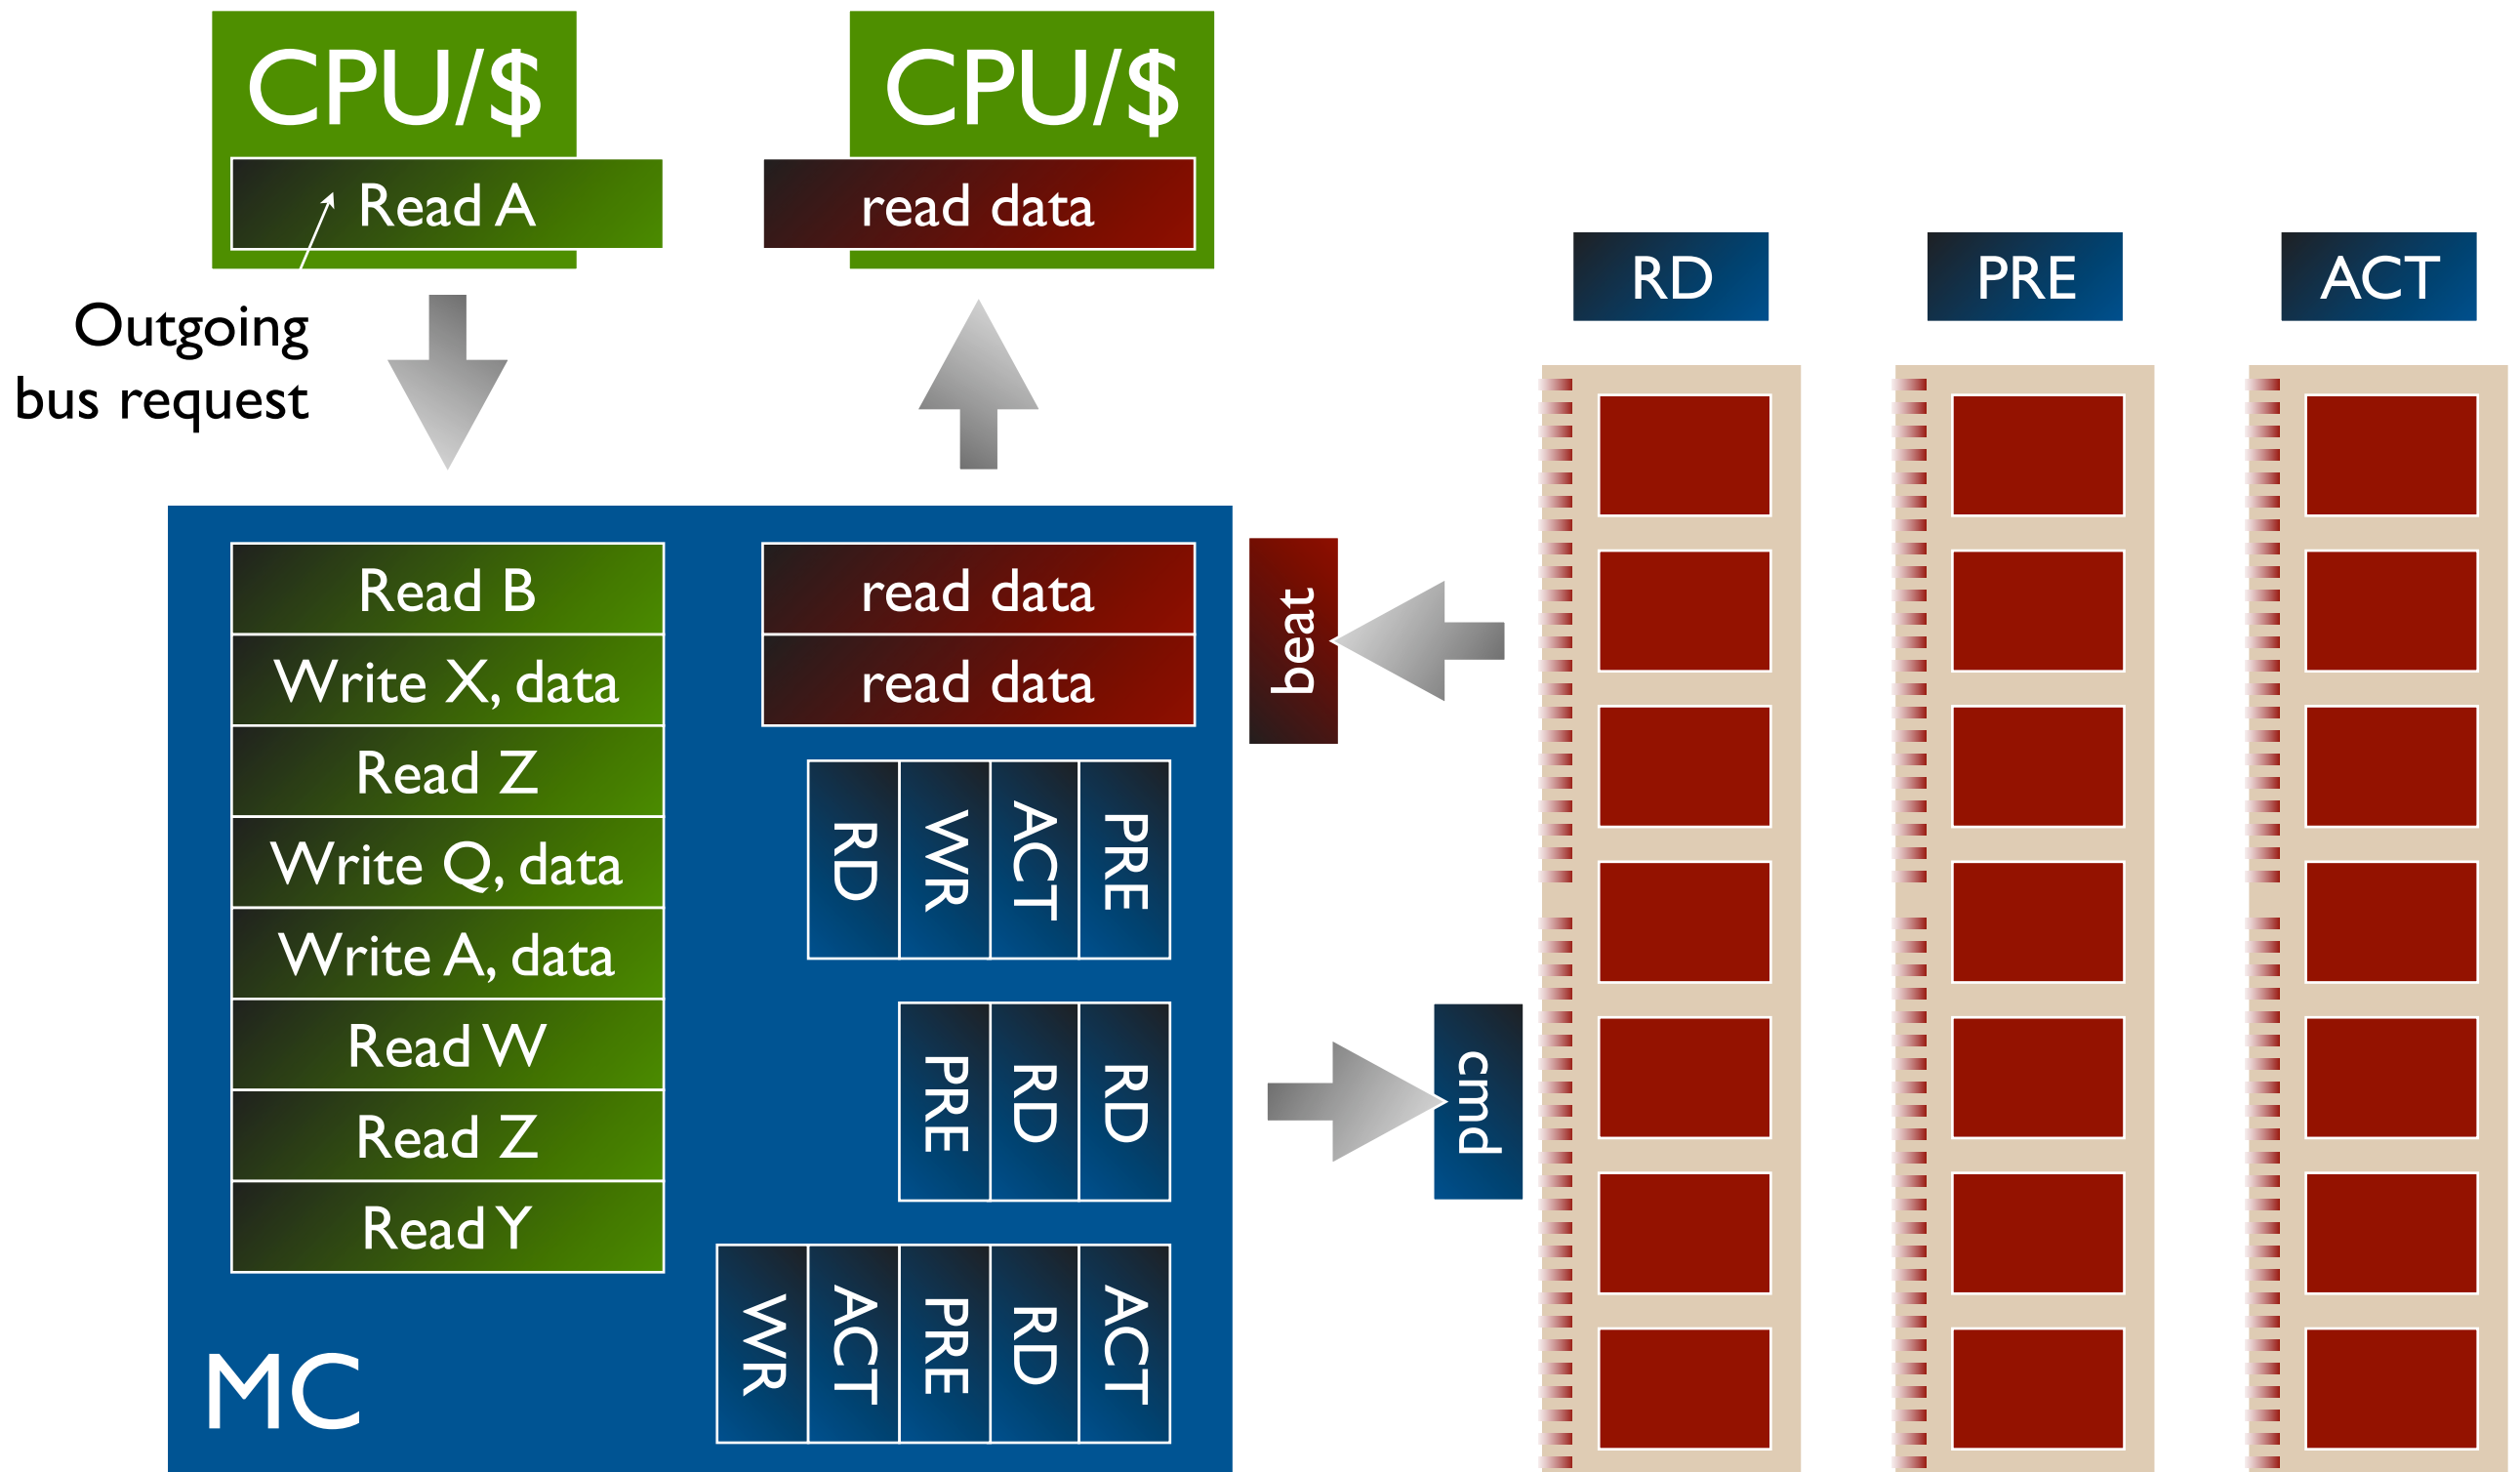

*What I'm Known for:*  
**Computers and  
Memory Systems**

# Perspective

# Primer

# Napkin Math: Palm HD

- $1920 \times 1080 \times 36b \times 60fps = 560MB/s$   
(~1GB/s incl. ovhd)
- 3 x4 DDR800 =  
1.2GB/s, 600mW
- Power budget =  
500mW **total**  
(DRAM 10–20%)

# Limit: Cost

- CPUs: **die area (& power)**  
Systems: **pins & power**  
(desktop: power is cost  
embedded: power is limit)
- FB-DIMM (Intel's solution to the capacity problem) observed former at cost of latter ... *R.I.P. FBD*
- Whither PERFORMANCE w/o limits? **10x at least**

*More on Start-Ups:*  
The Importance of  
(High-Tech) Design

Important development in last decade:

# **Manufacturing as a Service**

# The Basic Idea

Design Blueprint

You

Factory

Manufactured Device

# The Basic Idea

Design Blueprints

Factories

Assembly

Manufactured Device

You

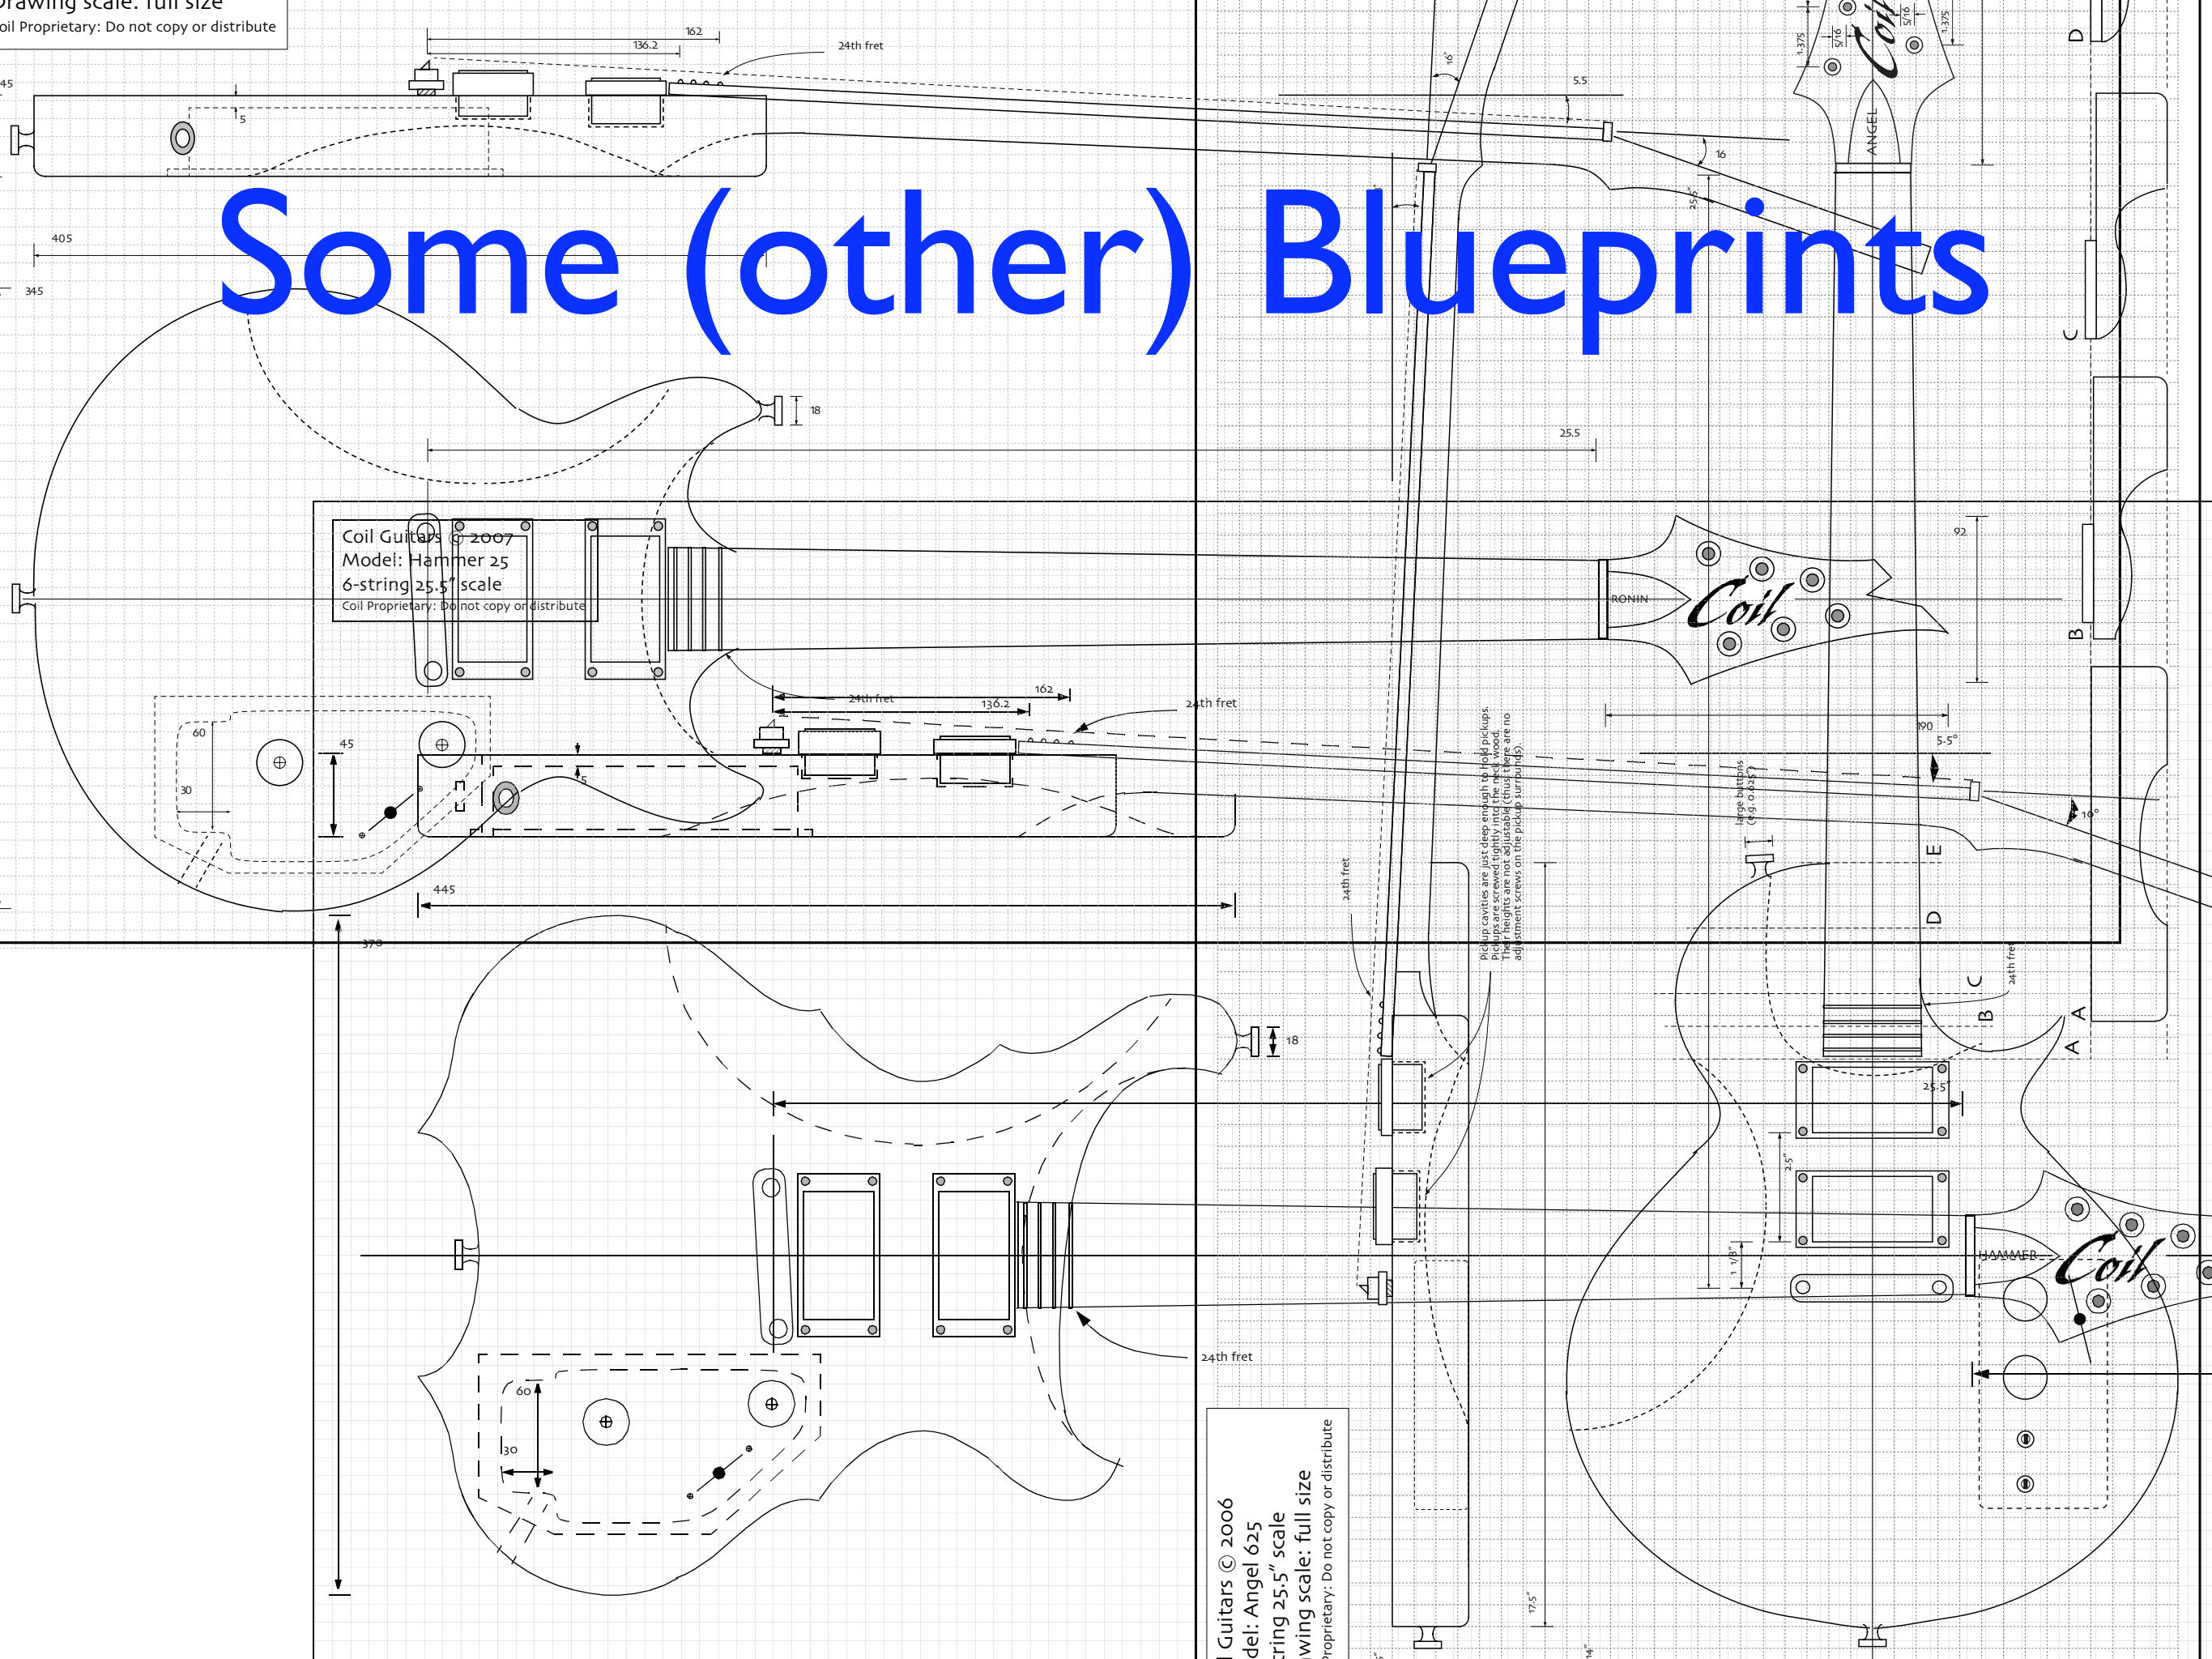

# Some Blueprints

Drawing scale: full size  
Coil Proprietary: Do not copy or distribute

# Some (other) Blueprints

Coil Guitars © 2007  
Model: Hammer 25  
6-string 25.5" scale  
Coil Proprietary: Do not copy or distribute

Coil Guitars © 2006  
Model: Angel 625  
6-string 25.5" scale  
Drawing scale: full size  
Proprietary: Do not copy or distribute

Pickup cavities are just deep enough to hold pickups.  
Pickups are screwed tightly into the neck wood.  
Their heights are not adjustable (thus there are no  
adjustment screws on the pickup surrounds).

# Pros & Cons

- Can't possibly compete with big companies
- Might fail
- Can't afford it
- Window of opportunity?
- Idea already proven in marketplace (shareware, boutique electronics)
- Win/win situation (even company failure is good résumé material)
- Low risk/reward ratio
- Start soon

**Bottom line: a path well worth exploring**

# Points to Take Home

- Engineering rocks
